- About Us -

.Alpha Seven for Technical Services, a company specialized in general technical works located in Dubai – the United Arab Emirates and distinguishes with expertise in the works of electromechanical projects integrally involved in construction, installation, maintenance, and operation using high-tech, and the latest engineering specifications and designs.

.We at Alpha Seven have the full capability to succeed in building professional relationships with our clients and provide them with the continuous long-term support, for our services to become effective, integrated, and competitive in the field of technical services.

.Alpha Seven has extensive expertise in electrical works from extensions of plumbing & sanitary installation, as well as mechanical works from installation and regular maintenance professionally and efficiently to provide comprehensive services.

- Our Mission

Spreading the culture of quality in true sense in the field of contracting and professional technical works in the United Arab Emirates, in order to achieve real competition between all small and large-scale companies that provide technical services, in addition to real estate developers. This is part of achieving the noble vision of the government of UAE to make it one of the most architecturally developed countries in the world. This is the message we adopt as we follow a lenient approach and a one-team method to provide the best practical solutions to the client's problems; thus, achieving the great vision.

- Our Team

The company has a highly experienced team of administrators, engineers, technicians and workers with technical and practical experience and sufficient technical knowledge to help our customers and provide efficient solutions, in addition to owning modern equipment that operate with advanced technologies to implement our projects and works according to the highest quality standards, and at competitive prices that suit customers and meet the needs and requirements of projects.

- Quality & Safety Policy

We consider the elements of quality and safety among the most important elements that we prioritize and cannot compromise; we also acquire the necessary competencies to provide our services from installations, maintenance, and operation, as we are keen to improve the quality of our works in light of the continuous challenges to meet the demands of various fields. Moreover, quality and safety are not options, but rather two basic values that we work to achieve in every project we deal with.

- Our Vision & Goals

.We look forward to expanding in future developed works along with the country's future vision to achieve real competition between companies and real estate developers, to apply advanced technology and environmental-friendly alternative energy and implement smart solutions in cooperation with successful companies, with an aim to provide services at a world-class level of high quality and professionalism.

.We aim to maintain the quality of our services in order to become an effective engine among leading companies in the field of technical works within and outside the UAE.

- Our Works

We are always working to develop the workforce in a technical and practical manner to achieve the goal of exploiting all available activities, in order to provide the best service to our customers combined under one roof; and these activities include:
